PAPER NUMBER

Please find below and/or attached an Office communication concerning this application or proceeding.

•		Application No.	Applicant(s)			
•		09/991,433	BROLIDEN ET AL.			
	Office Action Summary	Examiner	Art Unit			
		Zachariah Lucas	1648			
	The MAILING DATE of this communication appears on the cover sh et with the correspond nc address					
Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status						
1)⊠						
2a)□	This action is FINAL . 2b) ☐ Thi	is action is non-final.				
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
•	4) Claim(s) 1-33 is/are pending in the application.					
—	4a) Of the above claim(s) is/are withdrawn from consideration.					
5) Claim(s) is/are allowed. 6) Claim(s) is/are rejected.						
7)	Claim(s) is/are objected to.					
<i>,</i> —	Claim(s) <u>1-33</u> are subject to restriction and/or e	election requirement.				
Application Papers						
9) The specification is objected to by the Examiner.						
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.						
	Applicant may not request that any objection to the

Art Unit: 1648

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-8 and 18-25, drawn to methods of inhibiting the growth of
 hematopoietic cells by contacting the cells with a growth inhibiting amount of
 B19 parvovirus capsid or fragments thereof, classified in class 424, subclass
 233.1.
 - Claims 9-12, an d26-28, drawn to methods of inhibiting proliferation of
 endothelial cells by contacting the cells with a proliferation inhibiting amount of
 B19 parvovirus capsid, classified in class 424, subclass 233.1.
 - III. Claims 13-17, and 29-32, drawn to methods of inhibiting the migration of endothelial cells by contacting the cells with a migration inhibiting amount of B19 parvovirus capsid or fragments thereof, classified in class 424, subclass 233.1.
 - IV. Claim 33, drawn to isolated or purified fragments of parvovirus capsid, classified in class 424, subclass 233.1.

For each of Groups I, III, and IV above, restriction to one of the following is also required under 35 USC 121. Therefore, election is required of one of Groups I-IV, <u>and</u> one of inventions (a)-(g).

These inventions represent the isolated or purified fragment of a B19 capsid, or method using such a fragment, wherein the fragment:

(a) is a fragment comprising glutamine-glutamine-tyrosine; or consists of

(b) SEQ ID NO: 44;

(c) SEQ ID NO: 45;

(d) SEQ ID NO: 46;

(e) SEQ ID NO: 47;

(f) SEQ ID NO: 49; or

(g) SEQ ID NO: 50.

Page 3

Application/Control Number: 09/991,433

Art Unit: 1648

The inventions are distinct, each from the other because of the following reasons:

- 2. The inventions of Groups (a)-(g) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions relate to different fragments of the B19 parvovirus capsid, each having a different sequence. Because peptide sequence and function are tied, and because the claimed peptides have different functions, it is likely that the peptides have different modes of operation in performing the same functions (e.g. they have different binding sites and different binding affinities- and therefore different peptides may be more effective in one use than another). As each of these methods uses peptides with a different sequence, they are distinct.
- 3. The inventions of Groups I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions relate to several methods, each of which performs a different functions as described in the description of the Groups. As each of these methods performs a different function, and as they are not disclosed as usable together, the methods are distinct.
- 4. The inventions of Group IV and Groups I are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product is disclosed as usable in the

Application/Control Number: 09/991,433

Art Unit: 1648

methods of any of the above methods (pp.3-4), each of which is performing a different function. As the products may be used in any of the above methods, and as the methods are distinct, the product is distinct from any one of the above methods.

Page 4

5. The inventions Group II, III, and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions respectively relate to isolated or purified fragments of the B19 parvovirus capsid, and to methods of using whole capsids. As the claimed methods are not methods of using the fragments of Group IV, the method is not related to those products.

Election of Species

6. This application contains claims directed to, or generic to, the following patentably distinct species of the claimed invention of Group (a) above: the isolated or purified fragment of a B19 parvovirus capsid wherein the fragment consists of the sequence

(1) glutamine-glutamine-tyrosine;

(2) SEQ ID NO: 5;

(3) SEQ ID NO: 6;

(4) SEQ ID NO: 7;

(5) SEQ ID NO: 8;or

(6) SEQ ID NO: 48;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, the following claims are generic, depending on the Group (I or IV) elected above: respectively claims 4 and 21, and claim 33.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Page 5

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

- 7. It is here noted that some of the restrictions requirements made above fall within the scope of PTO Linking claim practice. In accordance with this practice as described in MPEP 809.03, linking claims will be considered with the elected invention. If the elected invention is found allowable, the linking claim will also be examined. If no substantive rejection is found for the linking claim, the restriction among the Groups it comprises will be withdrawn.
- 8. Applicant's attention is hereby directed to the following is a recitation of M.P.E.P. §821.04 regarding the restriction of claims to a product and processes of using the product, Rejoinder:

Where product and process claims drawn to independent and distinct inventions are presented in the same application, applicant may be called upon under 35 U.S.C. 121 to elect claims to either the product or process. See MPEP § 806.05(f) and § 806.05(h). The claims to the nonelected invention will be withdrawn from

Application/Control Number: 09/991,433

Art Unit: 1648

further consideration under 37 CFR 1.142. See MPEP § 809.02© and § 821 through § 821.03. However, if applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims which depend from or otherwise include all the limitations of the allowable product claim will be rejoined.

Where product and process claims are presented in a single application and that application qualifies under the transitional restriction practice pursuant to 37 CFR 1.129(b), applicant may either (1) elect the invention to be searched and examined and pay the fee set forth in 37 CFR 1.17(s) and have the additional inventions searched and examined under 37 CFR 1.129(b)(2), or (2) elect the invention to be searched and examined and not pay the additional fee (37 CFR 1.129(b)(3)). Where no additional fee is paid, if the elected invention is directed to the product and the claims directed to the product are subsequently found patentable, process claims which either depend from or include all the limitations of the allowable product will be rejoined. If applicant chooses to pay the fees to have the additional inventions searched and examined pursuant to 37 CFR 1.129(b)(2), even if the product is found allowable, applicant would not be entitled to a refund of the fees paid under 37 CFR 1.129(b) by arguing that the process claims could have been rejoined. 37 CFR 1.26 states that "[m]oney paid by actual mistake or in excess will be refunded, but a mere change of purpose after the payment of money...will not entitle a party to demand such a return..." The fees paid under 37 CFR 1.129(b) were not paid by actual mistake nor paid in excess, therefore, applicant would not be entitled to a refund.

In the event of rejoinder, the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104 - 1.106. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. If the application containing the rejoined claims is not in condition for allowance, the subsequent Office action may be made final, or, if the application was already under final rejection, the next Office action may be an advisory action.

The following is a recitation from paragraph five, "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai, In re Brouwer* and 35 U.S.C. §103(b)" (1184 TMOG 86(March 26, 1996)):

"However, in the case of an elected product claim, rejoinder will be permitted when a product claim is found allowable and the withdrawn process claim **depends from or otherwise includes all the limitations of** an allowed product claim. Withdrawn process claims not commensurate in scope with an allowed product claim will not be rejoined." (emphasis added)

In accordance with M.P.E.P. §821.04 and In re Ochiai, 71 F.3d 1565, 37 USPQ 1127 (Fed. Cir. 1995), rejoinder of product claims with process claims commensurate in scope with the allowed product claims will occur following a finding that the product claims are allowable. Until, such time, a restriction between product claims and process claims is deemed proper. Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution to maintain either dependency on the product claims or to otherwise include the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder.

Application/Control Number: 09/991,433 Page 7

Art Unit: 1648

9. Because these inventions are distinct for the reasons given above, and because the

literature and sequence searches required for any one of the groups is not required for the others,

restriction for examination purposes as indicated is proper.

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR

1.48(b) and by the fee required under 37 CFR 1.17(i).

11. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Zachariah Lucas whose telephone number is 703-308-4240. The

examiner can normally be reached on Monday-Friday, 8 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, James Housel can be reached on 703-308-4027. The fax phone numbers for the

organization where this application or proceeding is assigned are 703-308-4242 for regular

communications and 703-872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 703-308-0196.
